

# VirtualMan Powers Down

HEY 1LUN, CHECK OUT THE NEW VM-MOBILE.  
BY DRIVING CONSERVATIVELY, WE CAN GET  
OVER 60 MILES PER GALLON!

THAT'S, UH, A  
REALLY COOL SUPERHERO  
VEHICLE VIRTUALMAN. AND WE'RE  
ABOUT TO GIVE IT A TRY...IT'S THE  
ACCESSFLOW SIGNAL, AN I.T.  
PROFESSIONAL NEEDS OUR HELP!

PERFECT. I COULD JUST DO WITH A DOUBLE SHOT LOW FAT MOCHA.

WE'RE NOT HERE FOR YOUR DAILY JAVA JOLT ILUN, WE'RE HERE TO FIGHT ORGANIZATIONAL INERTIA.

THANK GOODNESS YOU'RE HERE VIRTUALMAN, I'M IVY GREEN THE DATA CENTER MANAGER AT HOT ROAST COFFEE AND I'M STEAMING MAD ABOUT OUR SERVER SITUATION.

SOMETHING TELLS ME SHE'S REACHING HER BOILING POINT.

(sob) NOT EVEN MY  
HOT HOUSE PLANTS CAN  
SURVIVE IN HERE

THIS CAN NOT BE GOOD  
FOR YOUR SERVERS

AND IT'S NOT  
HELPING THE GLOBAL  
WARMING SITUATION  
EITHER

YOU'RE TELLING  
ME! WE'RE EXPERIENCING  
INCREASED SERVER FAILURE.  
OUR RESOLUTION IS TO INSTALL  
CLUSTERING, BUT THAT MEANS  
STILL MORE SERVERS AND  
STILL MORE HEAT!

WHAT A  
VISCIOUS CIRCLE

HOW DID YOU GET TO  
THIS STATE IVY?
